## *Summary —*

I'm passionate about solving challenging problems and building software that is not only useful but also enjoyable to use. For me, the excitement of programming comes from constantly learning new things, searching for optimal solutions, and writing simple, clean code. If you want to know more about me, take a look at my portfolio website.

## *Experience —*

### **Front-End Developer | Troweb - Avid, Dubai - UAE (Remote)** Mar 2022 - Apr 2023

Troweb is a data-visualization SaaS platform from Avid. When I joined, the project was just getting started, and by the time I departed we had already delivered the MVP, which was an outstanding international success. My key contributions included:

- Delivered a fully functional MVP within 12 months using React, TypeScript, Remix.js, and GraphQL, securing multiple educational-institution contracts and attracting individual users worldwide.
- Modernized the front-end architecture by transforming legacy code into over 100 production-grade React/TypeScript components with Remix.js, praised internally as "exceptionally clean and testable."
- Developed and maintained numerous reusable AvidKit components, reducing inconsistency tickets by 65% and rolling them out across three company-wide applications.
- Integrated accessibility standards (WCAG) into all new components, complete with Storybook documentation and close designer–developer collaboration, elevating UX consistency and compliance.
- Mentored a junior developer through structured code reviews and pair-programming sessions, accelerating their onboarding process by 80% and fostering a culture of knowledge sharing.
- Technologies: TypeScript, React, Remix.js, Next.js, Styled Components, Storybook, Material UI, GraphQL, Jotai, Yarn/NPM, Docker, WSL, GitLab CI/ CD, Figma, Jira, VS Code, Windows/Linux(Ubuntu).

### **Full-Stack Developer (Personal Project) | Wallpapers Web Application** Jul 2024

This full-stack desktop-wallpaper platform delivers an immersive browsing experience for high-quality images. In this project, I architected core features across the full stack with these key achievements:

- Designed and implemented a secure authentication system (local form registration + Google OAuth 2.0 via Passport.js).
- Engineered social engagement modules (like, save, comment) on both client and server, creating a foundation for community-driven content and future user engagement.
- Built an infinite-scroll experience leveraging the Intersection Observer API and custom React hooks, reducing unnecessary DOM updates and boosting perceived responsiveness.
- Designed dynamic URL routing with React Router to support overlay-to-page transitions and shareable deep links, improving navigability and SEO readiness.
- Technologies: TypeScript, React, React Router, Sass, Express.js, MongoDB Native Driver, Joi, Passport, Jest, Supertest, GitHub Actions.

### **Full-Stack Developer (Personal Project) | Queries Web Application** Mar 2025

This project is a single-page web application that I designed and developed to deliver a fast, polished interface for browsing and filtering user-generated posts. My key achievements include:

- Engineered a dynamic search engine with filterable queries and fuzzy-matching logic.
- Overhauled state management using Redux Toolkit slices and RTK Query, reducing boilerplate by 60% and improving component render efficiency.
- Leveraged semantic HTML to enhance SEO, improving both accessibility and search engine rankings.
- Implemented comprehensive unit and integration tests on the front-end using Jest and React Testing Library.
- Technologies: React, TypeScript, Redux Toolkit, Jest, Sass, Express.js, MongoDB Native Driver, Joi, GitHub Actions.

## *Skills —*

Typescript, JavaScript, Html, Css, Sass, Python, React, Next.js, Remix.js, GraphQL, React Query, Redux, Storybook, Styled-Components, Nest.js, Express.js, MongoDB, PostgresQL , Jest, Passport, Linux, Vscode, Git, GitHub, Adobe XD, Adobe Photoshop

## *Education —*

### Software Engineering (GPA: 3.76 / 4.00 approximately)

Jahad Daneshgahi University of Kermanshah(JDKU) - 2019-2024
